GENERAL INFORMATION

Two-layer vibrated element with high strength, frost resistance, surface resistance to water and chemical de-icing agents. The staircase element has low abrasion and good adhesion properties. BEST concrete elements are permanently impregnated against contamination.

The minimum shipping quantity is 1 piece. The goods are loaded on marked pallets BEST (30 kg) or BEST large (38 kg) according to the production capacity of individual plants.

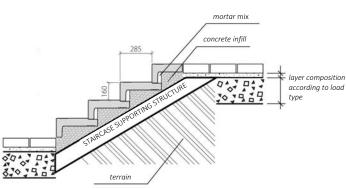

When laying, it is important to follow the correct procedure according to the instructions for use (www.best.cz).

using the BEST - CANTO stair tread in such a way that the vertical side of the fitting faces upwards

- the steps can be placed in a damp concrete mix or they can be mounted on pre-concreted stair treads fully in the mortar bed
- by the relative position of the interlocking fittings, the length of the tread contact can be determined in the range of 285 to 320 mm
- the joints between the elements are always filled with waterproof and frost-resistant grout
- installation starts from the bottom

using the BEST - CANTO stair tread in such a way that the vertical side of the fitting faces downwards

- the steps can be placed in a damp concrete mix or they can be mounted on pre-concreted stair treads fully in the mortar bed when mounting on pre-concreted stair treads, the space is filled with mortar mixture (see picture)
- the joints between the elements are always filled with waterproof and frost-resistant grout
- installation starts from the bottom
