GENERAL INFORMATION

Two-layer vibrated paving with high strength, frost resistance, surface resistance to water and chemical de-icing agents. The paving has low abrasion and good adhesion properties. BEST concrete elements are permanently impregnated against contamination. In winter, paving is maintained only by sweeping and using chemical de-icing agents.

Minimum shipping quantity is 1 layer, stones cannot be shipped as single units. The goods are loaded on marked pallets BEST (30 kg) or BEST large (38 kg) according to the production capacity of individual plants.

When laying, it is important to follow the correct procedure according to the instructions for use (www.best.cz). The paving is designed for purely walking surfaces, the implementation should be carried out in accordance with Decree No. 398/2009 Coll.
